

Ibis puts you and your patients in control

- More efficient use of your clinical time
- Increased adherence to your care plan
- Increased patient satisfaction

We teach your patients to self-manage their complex conditions through goal-setting, coaching, and remote monitoring, so you can devote your clinical time to making key care management decisions with your patients.

Our proactive daily support between office visits results in greater adherence to your care plan, improved quality measures, and fewer hospitalizations.

37% reduction in hospitalizations

For complex patients using Ibis Health in controlled trials.
